

Create Your Own Honorlock Page

We encourage you to develop an Honorlock page for your institution. This page can be adapted to support the needs of your faculty and students.

We recommend that you include the following sections:

- Why the institution is using Honorlock and online proctoring
- Support resources for both faculty and students:
 - [Knowledge Base](#)
 - [24/7/365 Support](#)
- Student-specific resources:
 - [Privacy and Data Security FAQs](#)
 - [HonorPrep](#)
 - [Minimum System Requirements](#)
 - [How to Use Honorlock](#)
 - [Top Student FAQs](#)
 - [Student Resources](#)
 - [Student Quick Fixes](#)
- Faculty-specific resources:
 - [Getting Started Guide](#)
 - [Recommended Exam Guidelines](#)
 - [Suggested Syllabus Verbiage](#)
 - [Honorlock Results Best Practices](#)
 - [Honorlock Mobile Application](#)
 - [How to Interpret Flags](#)
 - [Understand Course Analytics](#)
 - [Honorlock Quick Tips](#)
 - [Workspace Scan](#)
 - [Honorlock Desktop Application](#)

Honorlock's Commitment to Accessibility

Honorlock aims to provide genuine accessibility for all users. They engage a third party to conduct a yearly end-to-end accessibility test across all workflows to ensure accessibility and build their Voluntary Product Accessibility Template (VPAT). Honorlock prioritizes flexible accommodations, integrating with assistive technology, and conforming to compliance standards and guidelines. They conduct regular audits throughout the year to ensure accessibility standards are maintained. Discover [Honorlock's accessibility-first approach](#).

Honorlock Accessibility Checklist	Yes	No
Is Honorlock fully ADA-compliant?	✓	
Does Honorlock support and integrate with assistive technology?	✓	
Does Honorlock have an updated Voluntary Product Accessibility Template (VPAT)?	✓	
Does Honorlock allow instructors to provide accommodations for specific students?	✓	

To learn more, review [Honorlock's Accessibility Statement](#).

Honorlock Accessibility Resources

Ensure students understand that Honorlock is VPAT-certified and fully accessible to support their accommodation needs.

→ [FAQ's for Students](#)

When enabling Honorlock for your assessment, you may need to use Honorlock's Accommodations section to provide specific accommodations for certain students.

→ [Provide Accommodations](#)

Honorlock has an accessibility code that bypasses Honorlock proctoring when necessary.

→ [How to Setup a Bypass Pin](#)

Workspace Scan

Standardizes the pre-exam environment check through a guided, mobile-first workflow that replaces inconsistent 360° room scans. We recommend Workspace Scan because it protects

student privacy by focusing strictly on the desk area and ensures that proctors and faculty receive a clear, high-quality view on the first try, preventing unnecessary re-scans.

Honorlock Mobile Application

Serves as an optional, multi-use tool that allows students to use their smartphones for authentication, payment, workspace scanning, or as a side-angle camera. The mobile app is recommended to streamline the exam experience and give faculty enhanced visibility without requiring complex hardware setups.

Side-Angle Camera Option

Side angle camera provides a wider view of the student's hands, desk, and scratch paper, which is recommended in courses like math and chemistry where students show handwritten work. Automated position checks ensure proper setup before the test starts, deterring misconduct and minimizing interruptions. Students have the option to use the [Honorlock Mobile App](#), if enabled, to turn their smartphone into a high-quality side-angle camera.

Honorlock Desktop Application

The Desktop Application extends protection to the rest of the device by controlling what can run outside the browser. It blocks unauthorized external apps, screen sharing, virtual machines, unauthorized exam assistants like Cluely, and desktop AI tools. The Desktop Application applies only to the exams you select, so you can require it for midterms and finals and leave it off for routine quizzes.
